Sagalés

ENVIRONMENTAL SUSTAINABILITY POLICY

Sagalés is a family company specialising in mobility and other complementary services, centred mainly on public passenger transport and health services transport. As part of its activity, the company has established criteria governing its policy within the framework of its Integrated Management System (IMS).

The IMS includes the procedures and instructions that must be followed according to the requirements of relevant standards in different areas. Through this Environmental Sustainability Policy, the Management determines and carries out our mission: To facilitate the mobility of people, making available to them multiple innovative, sustainable, accessible and trusted models.

Developing the concept of environmental sustainability in our business model, as a strategic value, entails::

- Reducing to a minimum polluting emissions and the production of waste as well as accidental leaks of substances.
- Ensuring the conservation of natural resources, including both vehicle fuel consumption, by upgrading the fleet with more environmentally-friendly propulsion systems, and electricity consumption in our permanent facilities, by using green and renewable energies.
- Supporting initiatives that involve improving our energy efficiency, including the value chain, the design of the services that are our responsibility and that of product and service suppliers, and seeking to prevent energy wastage.
- Encouraging and promoting sustainability in the different areas of activity, minimising the carbon footprint of our services.
- Preparing the relevant reports related to sustainability.
- Constantly seeking out commitments, agreements and certifications that set our environmental commitment apart.
- Raising awareness and training our team of professionals on sustainability and environmental commitment.
- Complying with all applicable law and regulations as well as the contractual requirements of our customers, especially on matters related to the environment and sustainability.
- Continuously improving the Integrated Management System and its alignment with the business strategy in all areas.

These principles materialise in objectives that are regularly reviewed in IMS review meetings (RSD), led by General Management.

Our Environmental Sustainability Policy, as well as the rest of the policies deployed as part of our Integrated Management System, are available to all Sagalés employees for their information and compliance; moreover, any other interested party can find information through our website. This policy is regularly reviewed to ensure that it is always aligned with the company's mission and vision.

Approved by the Management of Sagalés
